WORK EXPERIENCE

CTOS (FINANCE INTERNSHIP) **March 2026 - August 2026**

- Processed 20–30 financial statements daily, including profit and loss statements, balance sheets, and cash flow statements.
- Verified financial figures and corporate information to support data accuracy and reliable reporting.
- Used Microsoft Excel, including VLOOKUP, and corporate database systems to cross-check and validate information.
- Completed the checking of 50 financial statements within a two-hour deadline for an ad hoc task.
- Conducted corporate research and reviewed company information to support internal analysis and reporting requirements.

RELEVANT ACADEMIC PROJECTS

Market & Industry Analysis — Trading Simulation

UiTM | Group Project

- Conducted top-down economic and industry analysis to evaluate market conditions and identify potential investment opportunities.
- Compared sector performance across Construction, Technology, and Utilities to support sector selection and capital allocation.
- Developed a simulated RM1,000,000 portfolio allocation across 45 stocks, using a diversified sector allocation and a combination of long-term and short-term strategies.
- Applied market research and portfolio-planning concepts to assess sector exposure, potential opportunities, and investment risk.

Technical Analysis & Paper Trading
INV556 | Individual Project

- Conducted simulated stock trading using an initial capital of RM50,000 and evaluated entry opportunities across Malaysian-listed companies.
- Applied breakout resistance, breakout patterns, trendline breakouts, and support-based trading strategies.
- Used technical analysis, stop-loss levels, and profit-taking considerations to manage simulated trading positions.
- Evaluated trading outcomes to understand the importance of risk control, disciplined execution, and decision-making under changing market conditions.

Asset & Fund Management — Portfolio Optimization
INV613 | Group Project

- Analyzed five Malaysian-listed stocks across Technology, Consumer, Construction, Plantation, and Energy sectors.
- Applied Modern Portfolio Theory (MPT) to assess diversification and portfolio combinations using historical stock-price data.
- Compared portfolio risk and performance using Sharpe ratio, Treynor ratio, and Jensen's alpha.
- Evaluated the relationship between expected returns, volatility, diversification, and risk-adjusted performance to support portfolio allocation decisions.

LEADERSHIP & ACTIVITIES

Protocol Committee Member (AJK Protokol) | *UNBOSSED: The Rise of Young Freelancers* **May 2025**

- Supported event protocol and coordination to help ensure the programme ran smoothly.

Training of Trainers: Fundamental vs Technical Workshop | *UiTM Segamat* **November 2025**

- Participated in an investment-related workshop organized by IMSA and BA251 Semester 5 students.
