1.0 ACKNOWLEDGEMENT

In the name of Allah, the Most Gracious, the Most Merciful. I thank Allah, Lord of the Universe, for granting me the blessings, strength, and endurance to complete this technical analysis report. Peace and divine blessings extend through time upon Prophet Muhammad (peace be upon him), who serves humanity as the perfect Messenger, demonstrating guidance for every person.

I express my sincere appreciation to my lecturer, Miss Nurul Haida binti Johan, for her continuous support and guidance throughout this project. Her thoughtful feedback and continuous motivational support were instrumental in the achievement of this report. May Allah grant His blessings to everyone who contributed to the success of this assignment.

2.0 INTRODUCTION

My Name is Nu man Nabil Bin Nazri and I am under 8 weeks of mock trading for practice trading. I am a swing trader, which implies that my trades are kept several days to several weeks, and I am not afraid to make smart decisions. I use information of candlestick patterns, naked charts, charts without all those extra lines, perhaps because the naked candlestick charts are suggestive of merchandise of naked women since candlestick patterns are portrayed as women as naked candlestick women and naked charts are women that may be naked because of the lack of so many extra lines making up the chart. Basically, I have four great methods to trade, which are: I buy a stock when it breaks out of a pattern it has been in; I buy a stock when it crosses a resistance level, which appears to be like a ceiling level that it has found it difficult to break; I buy when the stock reaches a support level, which is like a floor where it goes up bouncing back; and I also buy a stock when it breaks its trendline, which forms an indication that it may be in a new direction. To fulfill this, Miss Nurul Haida my lecturer seeded me with RM 50, 000 to begin this practice trading. Now I have purchased 14 different stocks and I have selected them according to these strategies. I am anticipating the show performance of these techniques in the programme.

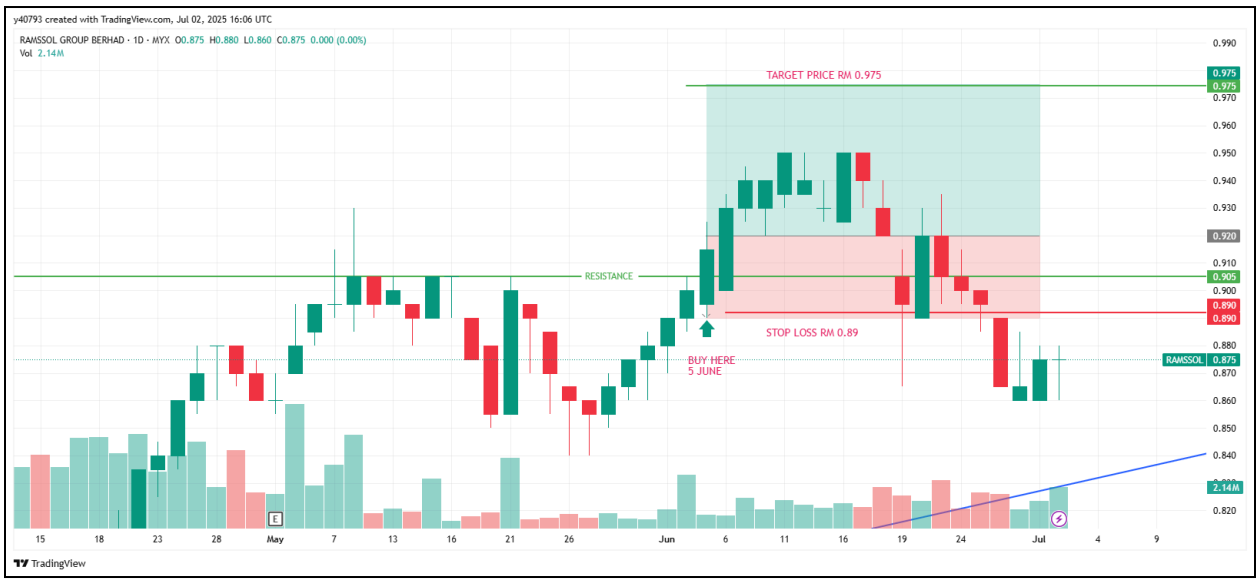

3.0 TRADING STRATEGY

3.1. BUY ON BREAKOUT RESISTANCE

3.1.1 RAMSSOL GROUP BERHAD

STOCK	ENTRY PRICE	QUANTITY	RISK REWARD	RISK %	REWARD %	TARGET PRICE	STOP LOSS
RAMSSOL	0.92	2000	1:2	3%	6%	0.975	0.89

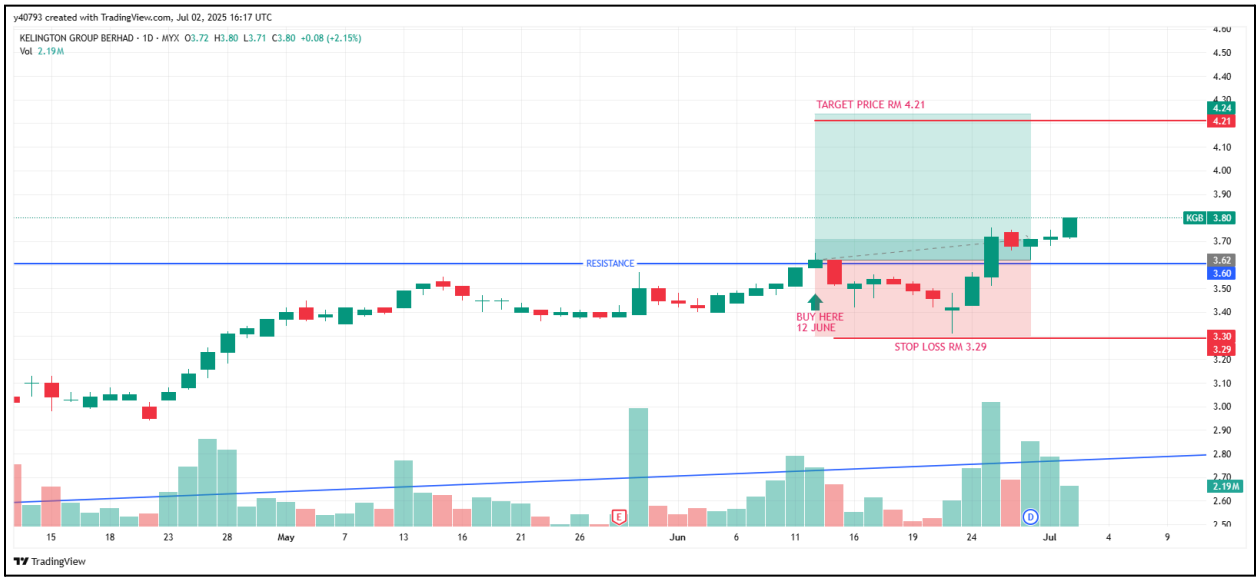

3.1.2 KELINGTON GROUP BERHAD

STOCK	ENTRY PRICE	QUANTITY	RISK REWARD	RISK %	REWARD %	TARGET PRICE	STOP LOSS
KGB	3.62	500	1:2	8.5%	17%	4.21	3.29

3.1.3 DELEUM BHD

STOCK	ENTRY PRICE	QUANTITY	RISK REWARD	RISK %	REWARD %	TARGET PRICE	STOP LOSS
DELEUM	1.59	1000	1:2	9%	16%	1.87	1.44

3.1.4 PECCA GROUP BERHAD

STOCK	ENTRY PRICE	QUANTITY	RISK REWARD	RISK %	REWARD %	TARGET PRICE	STOP LOSS
PECCA	1.53	1500	1:2	4%	8%	1.64	1.45

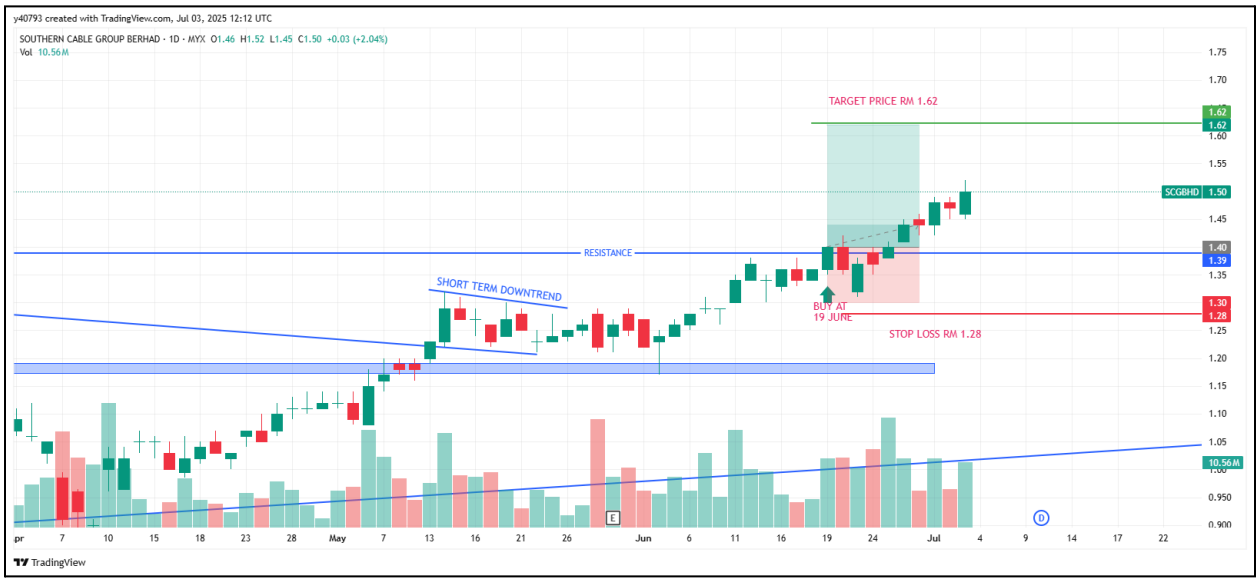

3.1.5 SOUTHERN CABLE GROUP BERHAD

STOCK	ENTRY PRICE	QUANTITY	RISK REWARD	RISK %	REWARD %	TARGET PRICE	STOP LOSS
SCGBHD	1.4	1500	1:2	8%	16%	1.62	1.28

3.2. BUY ON BREAKOUT PATTERN

3.2.1 FARM FRESH BERHAD

STOCK	ENTRY PRICE	QUANTITY	RISK REWARD	RISK %	REWARD %	TARGET PRICE	STOP LOSS
FFB	1.86	3000	1:3	3.33%	20.4%	2.03	1.80

Figure 3.2.1 Farm Fresh Berhad

3.3. BUY ON BREAKOUT TRENDLINE

3.3.1. POHKONG HOLDINGS BERHAD

STOCK	ENTRY PRICE	QUANTITY	RISK REWARD	RISK %	REWARD %	TARGET PRICE	STOP LOSS
POHKONG	1.02	3000	1:2	3%	6%	1.08	0.98

Figure 2.1.1 POHKONG Holdings Berhad Chart

3.3.2 MBMR RESOURCES BHD

STOCK	ENTRY PRICE	QUANTITY	RISK REWARD	RISK %	REWARD %	TARGET PRICE	STOP LOSS
MBMR	5.65	400	1:2	5%	10%	6.21	5.38

3.3.3 INNOPRISE PLANTATIONS BHD

STOCK	ENTRY PRICE	QUANTITY	RISK REWARD	RISK %	REWARD %	TARGET PRICE	STOP LOSS
INNO	1.70	3000	1:2	4%	8%	1.83	1.63

Figure 2.1.3 Innoprise Plantations Bhd

3.3.4 PARAGON GLOBE BHD

STOCK	ENTRY PRICE	QUANTITY	RISK REWARD	RISK %	REWARD %	TARGET PRICE	STOP LOSS
PGLOBE	0.71	11000	1:2	7%	14%	0.805	0.655

3.3.5 QL POULTRY

STOCK	ENTRY PRICE	QUANTITY	RISK REWARD	RISK %	REWARD %	TARGET PRICE	STOP LOSS
QL	4.53	400	1:2	3%	6%	4.8	4.34

3.4. BUY ON SUPPORT

3.4.1 UWC BHD

STOCK	ENTRY PRICE	QUANTITY	RISK REWARD	RISK %	REWARD %	TARGET PRICE	STOP LOSS
UWC	2.10	1500	1:2	9%	18%	2.48	1.91

3.4.2 MN HOLDING BERHAD

STOCK	ENTRY PRICE	QUANTITY	RISK REWARD	RISK %	REWARD %	TARGET PRICE	STOP LOSS
MNHLDG	1.92	1500	1:2	5%	10%	1.36	1.16

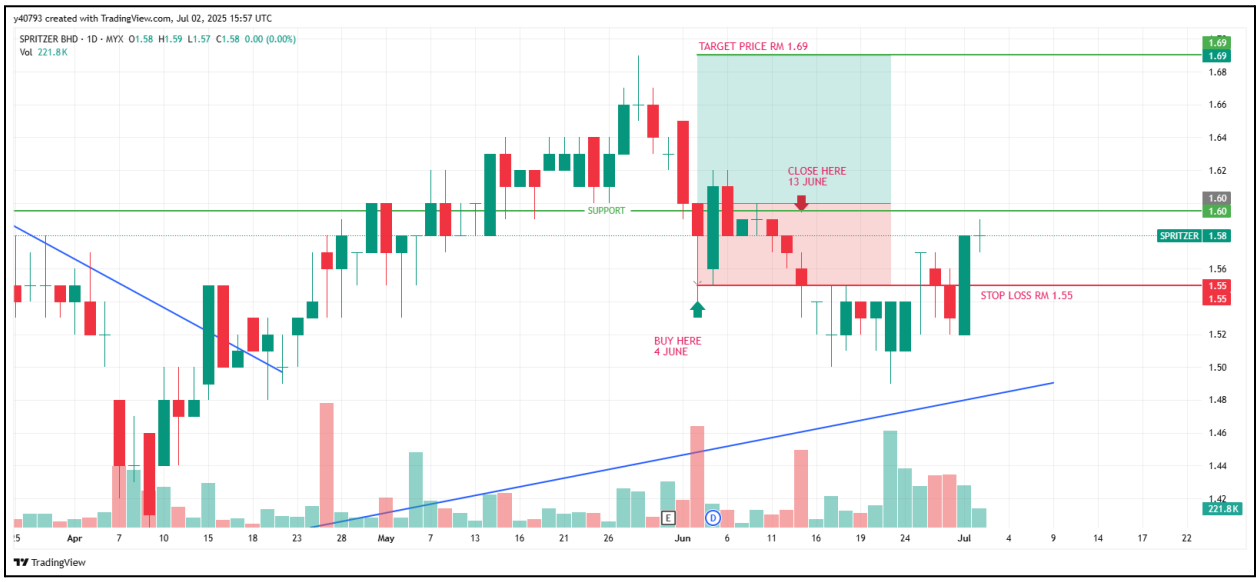

3.4.3 SPRITZER BHD

STOCK	ENTRY PRICE	QUANTITY	RISK REWARD	RISK %	REWARD %	TARGET PRICE	STOP LOSS
SPRITZER	1.6	1500	1:2	3%	6%	1.69	1.55

4.0 SUMMARY FOR EACH STRATEGY

4.1 SUMMARY FOR BUY ON BREAKOUT RESISTANCE

Buy on breakout resistance strategy is my first technique that i have leard, i will buy the stock when the price of stock reach the resistance level that is the highest level price, i will take a horizontal line to mark as a resistance level, i will wait until price break the line and than i buy the stock. I also check the volume for the stock, if the volume is high and there is breakout resistance, it will make my decision stronger. I use this strategy to buy 5 stocks. Based on the stock I have traded using this strategy, Ramssol hit my stop loss and the other four stocks that are Kelington Group Berhad, Deleum Bhd, Pecca Group Berhad and Southern Cable Group Berhad running profit but did not reach the target price.

4.2 SUMMARY FOR BUY ON BREAKOUT PATTERN

Buy on breakout pattern strategy. For this strategy I found one stock that has a bullish pennant, that is Farm Fresh Berhad. Pennants usually form over a shorter period of time. Based on chart Figure 3.2.1 Farm Fresh Berhad, the bullish pennants clearly can be seen in May 2025. I use a line to make markings for the pattern support and resistance. I use the flag pool as a range for my target price. After that i wait for the price to break the resistance level on the bullish pennants and i quickly buy the stock. Unfortunately for this stock its hit stop loss level and continue sideways.

4.3 SUMMARY FOR BUY ON BREAKOUT TRENDLINE

Buy on breakout trendline strategy. For using the trendline you need to have two higher high or two lower high after that use the trendline to mark it from the highest point. For buying reasons, I wait until the price breaks the trendline and I confirm it with the volume, and quickly buy the stock. For this strategy I manage to trade 5 stocks, one stock that is PohKong, that I closed due to low volume and sideways, the other two stocks hit my stop loss that is Mbmr and Pglobe and the other two stocks are running profit but not reach target price that is QI poultry and Innoprise.

4.4 SUMMARY FOR BUY ON SUPPORT

For this strategy to buy on support, firstly need to use a horizontal line and mark the support level. Support is the lowest price level. When the price reaches the support level, I will buy it. It has a high probability of reversal, pullback and continue to make new highs. For this strategy I manage to trade three stocks. Two stock hit stop loss level that is UWC Bhd and Spritzer and the other one reach my target price is Mnhholdings

5.0 CONCLUSION

This report summarizes my experience of using four types of stock purchase techniques: buying when price breaks above a ceiling, buying when certain chart patterns are completed, buying when the price advances above a downward sloping trend line and buying when the price reaches a floor. Comprehensively, I did not fare very well. These strategies did not only allow me to find some possible buying opportunities, but the process of translating them into a steady profit was not as simple as I expected.

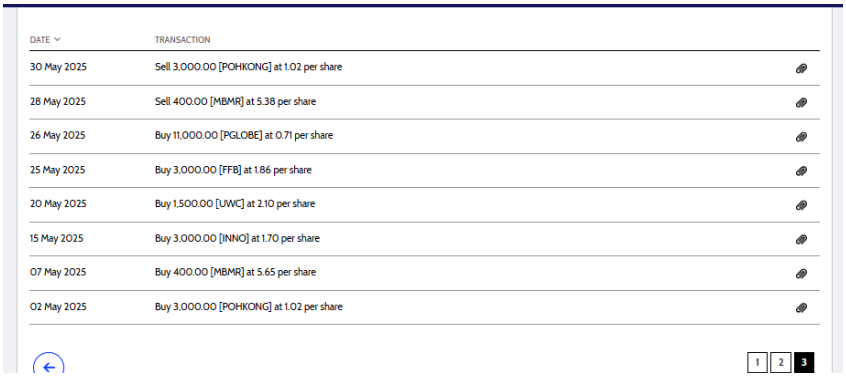

The most widespread problem that has been affecting me was the fact that most of my trades brought me to their pre-programmed parameters, or so-called stops-loss and sold to avoid a greater loss. In some cases, the things that even made money in the trade were not necessarily able to generate the profits that I had planned. This is indicative of the fact that it is not only reading an appropriate time to purchase a trade. I must better my decision making on when to take profits and more importantly how I manage risk by better setting stop loss points. It has also taught me some lessons that I shall be smarter in making my trading decisions and hopefully do better in the future. Overall from this mock trading I managed to get one stock that reached my target price.

MOCK TRADING

0% detected as AI

The percentage indicates the combined amount of likely AI-generated text as well as likely AI-generated text that was also likely AI-paraphrased.

Caution: Review required.

It is essential to understand the limitations of AI detection before making decisions about a student's work. We encourage you to learn more about Turnitin's AI detection capabilities before using the tool.

Detection Groups

0 AI-generated only 0%
Likely AI-generated text from a large-language model.

0 AI-generated text that was AI-paraphrased 0%
Likely AI-generated text that was likely revised using an AI-paraphrase tool or word spinner.

Disclaimer
Our AI writing assessment is designed to help educators identify text that might be prepared by a generative AI tool. Our AI writing assessment may not always be accurate (it may misidentify writing that is likely AI generated as AI generated and AI paraphrased or likely AI generated and AI paraphrased writing as only AI generated) so it should not be used as the sole basis for adverse actions against a student. It takes further scrutiny and human judgment in conjunction with an organization's application of its specific academic policies to determine whether any academic misconduct has occurred.

Frequently Asked Questions

How should I interpret Turnitin's AI writing percentage and false positives?
The percentage shown in the AI writing report is the amount of qualifying text within the submission that Turnitin's AI writing detection model determines was either likely AI-generated text from a large-language model or likely AI-generated text that was likely revised using an AI-paraphrase tool or word spinner.

False positives (incorrectly flagging human-written text as AI-generated) are a possibility in AI models.

AI detection scores under 20%, which we do not surface in new reports, have a higher likelihood of false positives. To reduce the likelihood of misinterpretation, no score or highlights are attributed and are indicated with an asterisk in the report (*%).

The AI writing percentage should not be the sole basis to determine whether misconduct has occurred. The reviewer/instructor should use the percentage as a means to start a formative conversation with their student and/or use it to examine the submitted assignment in accordance with their school's policies.

What does 'qualifying text' mean?
Our model only processes qualifying text in the form of long-form writing. Long-form writing means individual sentences contained in paragraphs that make up a longer piece of written work, such as an essay, a dissertation, or an article, etc. Qualifying text that has been determined to be likely AI-generated will be highlighted in cyan in the submission, and likely AI-generated and then likely AI-paraphrased will be highlighted purple.

Non-qualifying text, such as bullet points, annotated bibliographies, etc., will not be processed and can create disparity between the submission highlights and the percentage shown.

5% Overall Similarity

The combined total of all matches, including overlapping sources, for each database.
